Education

Smt. Indira Gandhi College of Engineering

BE in Computer Engineering

August 2023 – May 2027

- GPA: 8.7/10

Experience

Open Source Contributor

The Odin Project

Remote

June 2025 – Present

- Collaborated with maintainers through code reviews and discussions
- Contributed features and bug fixes

Projects

BattleShip

[github.com](#) 

- Developed a turn-based Battleship board game implementing official game rules
- Designed a 10x10 grid system with validation for ship placement (no overlap, no out-of-bounds)
- Implemented hit/miss logic, ship sinking detection, and win condition checks
- Applied object-oriented design to model ships, board, and player actions
- Created an interactive UI for ship placement and turn-based attacks
- Visualized hits and misses using color-coded grid updates

ReactMart

[github.com](#) 

- Created a shopping cart web application to practice React Hooks and component-based architecture
- Implemented add/remove cart functionality and managed state using Context API
- Used React Router for dynamic routing between product and cart pages
- Wrote component tests using React Testing Library to validate user interactions

CV Application

- Built a responsive CV builder web application using React and Vite
- Implemented interactive form inputs with real-time CV preview
- Managed application state entirely on the client using React state management
- Enforced code quality and consistency using ESLint

Technologies

Languages: C++, C, SQL, JavaScript

Frontend: React.js, Tailwind

Backend: Node.js, Express.js, Passport.js, JWT, bcrypt

Database: Postgresql

Tools: Linux, Git, Github, Postman

Relevant Coursework: DSA, OS, DBMS, OOPS
